## Security Alarm

### Feature:

System to detect safety hazard signs (such as smoke, carbon monoxide and so on), or security risks (such as foreign invasion, portal, open or broken glass and so on), to issue a warning attention sound/light reminders to facilities timely escape from danger or to avert crisis.

### Specification:

Power supply: 3~15VDC external power supply
Ripple voltage: 1Vpp(12VDC)
Trigger consumption current: 500mA(12VDC)
Dynamic current consumption: 300mA(12VDC)
Alarm output: 120±15dB(at 1ft.)+LED Strobe
Wireless transmission standard: IEEE802.15.4
Wireless frequency range: 2.4~2.483GHz
Wireless data rate: 250kbps
Wireless transmission of power: 18dBm
Wireless transmission of distance: 150M (no screen transmission)
Antenna type: printed antenna
